

Subject Screen:

- Subject creation to be verified in existing EDC System
- Subject ID autogenerated/ manual
- Subject name removed

Inclusion and Exclusion Criteria:

Objective

The Form/ Page Builder shall allow users to configure Inclusion and Exclusion Criteria at:

- Question/Field Level

Based on subject responses, the system shall automatically determine whether the subject is:

- Included
- Excluded
- Pending Review

Supported Configuration Levels

Level	Description
Block Level	Configure criteria for an entire block
Page/Form Level	Configure criteria for a page/form
Field/Question Level	Configure criteria based on question responses

Supported Criteria Types

Type	Description
Inclusion Criteria	Subject qualifies for study
Exclusion Criteria	Subject disqualified from study

Functionalities

Functionality	Description
Single Criteria	Configure one inclusion/exclusion condition
Multiple Criteria	Configure multiple conditions
AND/OR Logic	Support logical combinations
Auto Evaluation	System evaluates responses automatically
Subject Status Update	Subject marked Included/Excluded automatically
Real-Time Validation	Criteria evaluated immediately after data entry

Simple Configuration Screen

Configuration Item	Example
Criteria Type	Inclusion
Block	Eligibility Assessment
Page	Screening Form
Field/Question	Age
Condition	Greater Than or Equal To
Value	18
Result	Included

Example – Inclusion Criteria

Scenario

Subject age must be 18 years or older.

Block	Page	Question	Condition	Value	Criteria Type
-------	------	----------	-----------	-------	---------------

Consent Management Workflow

[Product Name]

Eligibility Assessment	Screening Form	Age	>=	18	Inclusion
-------------------------------	----------------	-----	----	----	-----------

Behavior

If Age >= 18

→ Subject Included

Example – Exclusion Criteria

Scenario

Pregnant subjects are excluded.

Block	Page	Question	Condition	Value	Criteria Type
Medical History	Eligibility Form	Pregnancy Status	Equals	Yes	Exclusion

Behavior

If Pregnancy Status = Yes

→ Subject Excluded

Example – Multiple Criteria

Criteria	Condition
Age >= 18	AND
Consent Signed = Yes	AND
Pregnancy Status = No	

Behavior

If all conditions satisfied

→ Subject Included

Else

→ Subject Excluded

Subject Eligibility Status

Status	Description
Included	Subject meets inclusion criteria
Excluded	Subject meets exclusion criteria
Pending Review	Criteria evaluation incomplete
Screen Failed	Subject failed eligibility assessment

UI Behavior

Criteria Builder Table

Criteria Type	Block	Page	Field	Condition	Value	Logic
Inclusion	Eligibility	Screening	Age	>=	18	AND
Inclusion	Eligibility	Screening	Consent Signed	Equals	Yes	AND
Exclusion	Medical History	Eligibility	Pregnancy Status	Equals	Yes	OR

Expected Result:

- IN Study Workspace,
 - Upon field selection the subject shall be included or excluded from the study, and the same shown on the table (View) section with a badging.
 - Included - Green
 - Excluded: Red
 - Pending Review: Yellow/ Amber

Business Rules

1. Criteria can be configured at:

Consent Management Workflow

[Product Name]

- Page/Form level
 - Field level
- 2. System should support:
 - Single criteria
 - Multiple criteria
 - AND/OR logic
- 3. Criteria evaluation should occur:
 - On field change
 - On save
 - On submit
- 4. Exclusion criteria should take higher priority over inclusion criteria.
- 5. Subject eligibility status should update automatically.
- 6. Eligibility results should be available in:
 - Subject dashboard
 - Screening reports
 - Activity logs/audit trail.
